

EZFLOW^{XR}

Hydraulic Trap

HYDRAULIC TRAP SYSTEM

Delivering the best-in-class performance, our patented EZ Flow^{XR} Hydraulic Trap System continues to be the number one selling power trap system on the market and is the preferred choice for severe-duty applications. Our new XR Series comes equipped with top-notch electronic upgrades and OE grade emergency override system.

Features

- The operator can stay out of the dust by opening the traps from the cab of the truck, using the multi-function remote.
- Operates using a single 12 volt hydraulic motor
- Nylon protected hydraulic hoses and stainless steel fittings for increased durability
- No trap operator or motor to interfere with swing auger
- Easily control product flow by feathering the door open and close
- Heavy duty reinforcement brackets for hi-density commodities (Frac Sand)
- Hydraulic motor and reservoir are protected in the apex of the trailer
- Quick release emergency override
- Simple 3 button remote design with large easy-to-read buttons
- Multi-function remote programs up to 5 trailer accessories
- Emergency Override System now standard feature with every order
- 3 Year "Peace of Mind Warranty"

WHAT'S NEW

TIMPTE

Since 1884

New XR Keypad is a sleek and heavy-duty design that allows for the controller box to be protected in the apex of the trailer.

New XR Remote allows for the operator to directly choose the function without having to cycle through previous functions. This new feature makes selecting the correct function quick and easy.

OVERRIDE SYSTEM

In the event of an emergency due to electrical or mechanical issues the EZ Flow^{XR} doors can be easily converted into manual operation. The emergency manual override utilizes quick release pins and straps to open the door. This new override system is not only easy to use, but provides additional ground clearance compared to previous override systems.
